

BLUE SHIFT TECHNOLOGY LLC

IT Engineering & Security · Federal Capability Statement

UEI: LU9JGHGSDK67

CAGE: assignment in progress (DLA)
Small Business - all listed NAICS (13 CFR 121)

CORE COMPETENCIES

- **IT Security Engineering:** OPSEC as a process - CIS hardening, network segmentation, egress control, MITRE ATT&CK-aligned detection, rehearsed incident response.
- **Identity & Access Management:** phishing-resistant MFA (FIDO2/WebAuthn), SSO (SAML/OIDC), RBAC/ABAC, SCIM lifecycle, privileged access - NIST SP 800-63.
- **KYC/AML & Financial-Crime Tooling:** sanctions & PEP screening, transaction monitoring, case management, SAR/STR workflows - FATF-aligned, incl. virtual assets.
- **OSINT & Investigative Support:** attack-surface and digital-footprint mapping, credential and breach exposure, due diligence and background research.
- **Cloud & Infrastructure:** AWS, Azure, Google Cloud as code (Terraform, Ansible) - migrations, high availability, disaster recovery, observability.
- **Software, Data & IT Administration:** web apps, REST APIs, integrations, automation; Microsoft 365 / Google Workspace, endpoints, helpdesk.

DIFFERENTIATORS

- **No handoff:** the engineers who build and run the systems are accountable for securing them - one team, one owner of the outcome.
- **Financial-crime depth:** working AML / crypto-asset compliance expertise behind the tooling - a niche most IT small businesses do not carry.
- **Verifiable standards:** work is built and measured against NIST, ISO/IEC 27001, MITRE ATT&CK and FATF - no unverifiable claims.
- **Government owns everything:** repositories, credentials, configuration and documentation handed over from day one.
- **Remote-first and fast:** fixed quotes within one business day; delivery documented and restore-tested.

HOW TO BUY

- **Small business set-asides:** eligible for total SB set-asides under FAR part 19, incl. the automatic \$15k-\$350k small business reserve (FAR 19.502-2(a), thresholds effective Oct 2025).
- **Micro-purchase / simplified:** government purchase card accepted; quick fixed quotes under the \$15,000 micro-purchase threshold.
- **Subcontracting:** IT security, IAM, OSINT and cloud workstreams for primes needing small business participation.
